Dear Sir,

On the behalf of the Department of Computer Engineering, we express our thanks for spanning your time & conducting a session on "AngularJS" for our T.E. Computer Engineering students on Wednesday, 27th March 2019. The session was really very good and it helped our students to understand AngularJS concept and real time use for daily life.

Looking forward for the same kind of cooperation in future.

Mr .Rajesh Khele (Founder & Director-Animationwala.com, Pune)

Ms.Uma B. Karanje (Assistant Professor, MMIT, Pune)

Total no. of participants : 45

Objectives :

The objectives of the session is as follows :

- To understand the installation and interface with Blender S/W
- To add basic shapes in 3D view
- To understand & use materials and textures
- To understand the use of lights & camera in a scene
- To create simple animation & add sound track to blender file
- To convert blender file into MPEG video file format

FDP Contents:

Since animation is an art which requires a tool to express the creativity, we have chosen Blender which is a free and open source software. In this workshop, we had discussed about the 3D visualization concept, talked about the system configuration required for using Blender, and explained the installation procedure.

- **Blender Interface**

Blender follows its own user interface conventions. Instead of making use of multiple windows as defined by your particular OS/GUI, it creates its own “windows” within a single OS/GUI window, which is best sized to fill your screen. Blender was originally created by a 3D graphics shop for their own in-house use.

- **Different screen types**

- The Info Editor at the top.
- A large 3D View.
- A Timeline at the bottom.
- An Outliner at the top right.
- A Properties Editor at the bottom right.

- **Modeling**

Four 3D Views (top, front, side and perspective), Properties editor for Editing.

- **Lighting**

3D Views for moving lights, UV/Image editor for displaying Render Result, Properties editor for rendering and lamp properties and controls.

- **Materials**

Properties editor for Material settings, 3D View for selecting objects, Outliner, Library script (if used), Node Editor (if using Node-based materials)

- **Painting**

UV/Image Editor for texture painting image, 3D View for painting directly on object in UV Face Select mode, three mini-3D Views down the side that have background reference pictures set to full strength, Properties editor.

Program Outcomes

- Interact with the interface to add basic shapes
- Modify and apply materials and textures
- Add and adjust lights and camera in a scene
- Animate simple objects to create animation
- Create animated MPEG video file with sound

Objectives

The objectives of the session as follows :

- To understand career path in AR/VR
- To aware upcoming projects in AR/VR & IoT
- To realize the importance of upgrading to technology
- To organize one day workshop for the same.

Seminar Contents:

1. Difference between AR/VR
2. Concepts of Blockchain
3. Upcoming projects in IoT

Program Outcomes

- Students got the overview of AR/VR
- Students understood the importance of upgrading to technology
- Participants found in which way to direct our knowledge skills
- Necessary training required for new technologies

No of students attended: 105
